

Fractional CTO, Architecture & Engineering Delivery Consulting

Senior technical and delivery leadership for SaaS, E-commerce, and Healthcare platforms — architecture, execution, and predictable outcomes without a full-time CTO.

What I Do

I help founders and leadership teams design, build, and deliver complex software systems with confidence. As a Fractional CTO and Engineering Delivery Leader, I ensure teams build the right systems and ship them predictably, reliably, and at scale.

Domain Expertise

SaaS Product Engineering	Multi-tenant SaaS architecture, subscription & usage-based billing, API-first platforms, scalability, performance & reliability engineering.
E-commerce & Marketplaces	High-volume order processing, payment integrations, inventory & fulfillment flows, marketplace and accounting automation.
Healthcare & HIPAA-Aligned Systems	HIPAA-aware architecture, secure access control, audit logging, compliance-aligned cloud infrastructure, risk assessment and security hardening.
Cloud, DevOps & Platform Engineering	AWS, Azure & GCP architecture, CI/CD pipelines, Infrastructure as Code, cloud cost optimization, observability, reliability and security best practices.

How I Help

- CTO-as-a-Service combining architecture ownership with delivery leadership
- Engineering execution oversight, sprint planning, estimation & release readiness
- DevOps & CI/CD governance and delivery risk management
- Architecture reviews with clear, business-aligned technical roadmaps
- Cloud & DevOps advisory focused on reliability, security & cost optimization

Engineering Delivery & Execution

- Sprint planning & delivery cadence
- Release planning & deployment strategy
- Engineering KPIs & delivery metrics
- Dependency & program-level coordination
- Incident management & production readiness

Engagement Models

Fractional CTO / Delivery Leader (Monthly Retainer)

Architecture Review (Fixed Scope)

Short-Term Advisory for launches, scale-ups, migrations and delivery turnarounds
